# PROFESSIONAL SUMMARY

Network Engineer with 10+ years of hands-on experience across enterprise networks, data centers, and network security. Experienced in implementing, configuring, operating, and troubleshooting Cisco ACI and VXLAN EVPN fabrics using Cisco Nexus platforms. Strong background in enterprise routing and switching, firewall integration, traffic steering, and network modernization. Hands-on experience with FortiGate, Palo Alto, and Cisco FTD, including firewall routing, security policies, HA, VPN, and integration with data center networks.

# CORE TECHNICAL SKILLS

**Data Center & Fabric Networking:**

Cisco ACI, VXLAN EVPN, MP-BGP EVPN, Spine-Leaf Architecture,  Cisco Nexus 9000/7000/5000/2000, NDO, NDFC

**Routing & Switching:**

BGP, OSPF, EIGRP, PBR, Route Maps, VLAN, Trunking, STP, RSTP, EtherChannel, vPC, HSRP

**Network Security:**

FortiGate, Cisco FTD, Firewall Policies, NAT, DNAT, VIP, HA, IPsec VPN, SSL VPN, VDOM

**Network Operations & Monitoring:**

Network Monitoring, Incident Management, Troubleshooting, Configuration Management, PRTG, SolarWinds

# PROFESSIONAL EXPERIENCE

## MCI — Network Engineer

**Nov 2022 – Present**

1. Implement and operate enterprise network infrastructure across 8 distributed data centers, supporting critical organizational services and infrastructure.
2. Implemented and supported a new Cisco ACI fabric consisting of 2 Spine switches, 14

Leaf switches, and 3 APIC controllers, supporting approximately 80 physical servers and 200+ VMs.
3. Implemented and troubleshot a new two-site Multi-Site VXLAN EVPN fabric using Cisco Nexus 9000 switches, MP-BGP EVPN, OSPF underlay, VXLAN VTEPs, and Border Gateways.
4. Implemented and troubleshot FortiGate HA firewalls integrated with Cisco ACI using a one-arm design, Service Graph, and PBR-based traffic steering for East-West and North-South traffic inspection.
5. Troubleshot complex firewall traffic flows and routing loops during North-South traffic steering; worked with the team to develop a design using a separate VDOM for the external network and route traffic through the appropriate firewall inspection path.
6. Contributed to data center modernization and capacity expansion through Cisco Catalyst-to-Nexus migrations, including Nexus 9000, 7000, 5000, and 2000 platforms, performing configuration, change-window activities, and troubleshooting.
7. Performed network configuration, operational support, troubleshooting, documentation, and collaborative technical problem-solving across network and security environments.

# SEP (Saman Electronic Payment) — Network Engineer

**Nov 2021 – Oct 2022**

1. Participated in the implementation and configuration of a new network infrastructure for a new corporate building supporting approximately 100–200 users and 20 Access Switches.
2. Configured Cisco Access, Distribution, and Core switching infrastructure and established WAN connectivity with other corporate buildings.
3. Participated in the deployment and configuration of a new security perimeter, including firewall connectivity, access requirements, routing, and Internet access infrastructure.
4. Implemented and configured a pair of Cisco Nexus 93180 switches as the core of the new building network.
5. Performed Rule management and network-related configuration across Palo Alto and Cisco FTD environments, while also working with FortiGate firewalls.
6. Participated in Cisco ACI operations, configuration, monitoring, and troubleshooting as part of the network team.

# HiWeb — NOC Expert

**Nov 2013 – Nov 2021**

1. Monitored and supported network infrastructure across 1,000+ telecom centers, handling network incidents and service-impacting events in a large-scale operational environment.
2. Progressively took on additional access and responsibilities, moving from network monitoring and incident handling into troubleshooting and configuration activities.
3. Worked with Cisco routers and switches, including BGP and OSPF-based network environments.
4. Performed network troubleshooting, incident management, configuration activities, and operational support.
5. Used PRTG and SolarWinds for network monitoring and service visibility.

# EDUCATION

**B.Sc. in Information Technology**

Payam Noor University — 2011
